

Carded and Raw Sisal

Carded and raw sisal fibre mainly used in gypsum products as a structural element to provide additional reinforcement.

The combination of sisal plant fibre with water and gypsum produces a composite material that is light, tough and strong and provides greater resistance to stress.

Sisal fibre is a natural product that, once it reaches the end of its cycle, decomposes without polluting nature, unlike synthetic materials.

Carded sisal is packed in 50 kg bales or 10 kg rolls to be more manageable.

IDEALI PER:

Edilizia

SCHEMA TECNICA:

Materiale:	Sisal
Colore:	Naturale
Confezione:	Rotoli Balla

- Possibilità di personalizzare l'articolo con etichetta, codice a barre e imballo specifico (scatola, pacco, blister, busta, ecc).
- Su richiesta possiamo valutare e realizzare, qualsiasi altro tipo di confezionamento in base alle vostre esigenze.
